Cover Letter for Residency Position

Dear Dr. Kelso,

I am writing to express my strong interest in the electrical engineering position at your organization. As a dedicated electrical engineering student at the University of Minnesota with a passion for research and innovation, I am excited about the opportunity to contribute to your team's groundbreaking work.

My academic background and research experience make me a strong candidate for this position. Through my work as an Independent Research Lead at Minnetonka Research, I have developed expertise in machine learning applications, successfully leading a yearlong project developing a model for reading Gregg shorthand. This experience, combined with my international research internship at KTH Royal Institute of Technology in Stockholm, has given me a unique perspective on collaborative research and the ability to work effectively in diverse, technical environments. My published research and model repository demonstrate my commitment to producing tangible, impactful results.

I would welcome the opportunity to discuss how my research background, technical skills, and passion for innovation can contribute to your organization's success. I am flexible with interview scheduling and can be reached at the contact information provided above. Thank you for your time and consideration of my application.

Sincerely yours,

Alexander Weimer
